MONEY FOR THE FAIR. CHICAGO, Aug. 8.-in a published interview, Director General Davis is quoted as saying that congress had really given the fair \$3,404,000, or \$903,000 more than is generally understood the bill called for. His summary of the various items brings the total to the sum stated, as follows: World's Columbian commission, \$120,000; government commission board, \$400,000; medals and diplomas, \$103,000; for loss in coinage of souvenirs, \$170,000; World's Columbian exposition, \$2,500,000; total, \$3,283,000. Mr. Davis then goes on to show how this amount can still be increased by disposing of the souvenir half dollars at a premium. "Now from will see," said he, "that I have not counted anything for the disposing of the souvenir nait doings at a premium. "Now you will see," said he, "that I have not counted anything for the premiums on the half dollars. I know of an offer of 20 per cent premium on the whole issue that is ready now. My opinion is that every one of the half dollars is worth at least 75 cents. A moderate estimate would give us \$500,000 profit there, so that we may thank congress for making us a present of over \$4,000,000, when we had asked only a loan of \$5,000,000."

Amalgamated Association and Return to Work.

The New Workmen at the Homestead Plant Said to be Dissatisfied With Their Prison-Like Surroundings.

Secretary Lovejoy Avows the intention to Continue the Arrest and Prosecution of the Leaders of the Men-The New York Building Trades Strike Nearing the End. Fort Worth Printers Walk Out-General Notes.

HOMESTEAD, Pa., Aug 8-The strikers at Duquesne went to work this morning, and the Carnegie Steel company has scored one victory. As 7 o'clock approached the number of men who had entered the mill yard reached 400. About sixty men who were leaders in the sympathy strike movement gathered on the road near the mill gates and watched in silence the men going to work. Finally the mill whistle blew for 7 o'clock. At that a large Irishman exclaimed in a loud woice: "Well men, the jig is up; we had better hustle for our old places." This was the signal for a panic and the entire crowd ran Ioward the gate. The men were admitted into the Amaigamated association, and, at no little expense, they went out on the sympathy strike movement two weeks ago. By their surrender they are expelled from the Amaigamated association and the Carnegle company has two non-union mills. The effect of the break at Duquesne can not but prove harmful to the men at Homestead, although the leaders will not believe it. Yet at Duquesne steel billetts can be manufactured and sent to Homestead to be rolled into plates by the non-union men, so that the firm will be in far better condition to fill its contracts and prosecute its fight been. gates and watched in silence the men going

condition to fill its contracts and prosecute HOMESTEAD, Pa., Aug. 8.-There were about ten non-union men at the Amalgamated headquarters this morning. They had left the mill, as it was too much like a prison. One mechanic said that thirteen men in his crew quit this morning, and would be out when they got their money. He further asserted that 150 men went to Pittsburg on Saturday night and only seventy-five returned this morn-ing. A German roll turner from Essex is among the deserters. He claimed that he had to sleep in his pants to prevent their being stolen. One man from Bermuda said that he had come out to get a glass of beer, and if he could get back and tell the beer, and if he could get back and tell the people how they would be treated, 150 men would quit at once. The locked-out men are greatly encouraged by this turn in their favor, and say that the Duquesne matter is a stand-off now.

PITTSBUEG, Pa., Aug. 8.—The sensation of the day at the Carnegie Steel company's Union mills was the resignation of Night Superintendent and Pudding Boss Richard Nichols. He has been in the employe mills. Immediately after leaving the works he went to the Amalgamated headworks he went to the Amaigamated head-quarters, where he stated that the step he had taken was due to the fact that his work had been made extremely unpleasant since the strike had been manugurated. In regard to the number of men working he regard to the number of then working he stated that it was less than at any time since the strike begun, and that before the plant can be successfully operated it will be necessary to make many repairs. The acquisition of Mr. Nichols has greatly

encouraged the strikers.

The steamer Tide today took 200 non-union men to Homestead.

THE LEGAL BATTLE.

PITTSBURG, Pa., Aug. 8. — Secretary Lovejoy of the Carnegie Steel company is authority for statements showing the stead strikers who engaged in the riot on July6 and held the company's property un-til dispossessed by the soldiers. The record goods slaughtered of fifty-three informations for murder or aggravated riot and eighteen arrests on these charges is to be increased threefold. The informations will be made this week. On the other hand, W. J. Brennan, for the Amalgamated association, says that the strikers do not propose to be behind the company in the matter of prosecutions for inciting riot, and that charges will be made early this week against members of the firm and the Pinkertons. Mr. Brennan states that they are waiting for informa-tion where something else may turn up. He added that assertion was necessary in this age and that workmen must unite to hold their own against the capitalists. He said that arbitration papers had been served on the company, but if the members of the firm decline to take up the issue. nothing further can be done. The law is

NEW YORK BUILDERS.

NEW YORK, Aug. 8.-The general strike, of the building trades, which was begun two weeks ago in sympathy with the union material deliverers, who had been locked out by the Building Material Dealers' association because they refused to deliver supplies to the buildings for which the supplies to the buildings for which the tron league held contracts, will probably end today. "The outward gold movement has been the most serious check to enthusiasm on the bull side. This feature, together with the growing use of silver, is of course a source of uneasiness. Nevertheless, this question has been uppermost for a long period; and its follies and dangers are taking no one by surprise. We are less the Europeans who at such a moved an address in reply to the queen's speech and Mr. Cross seconded the ad-

question has been uppermost for a long period; and its follies and dangers are taking no one by surprise. We are less alarmed than Europeans, who at such a distance naturally take the most cautious, if not the worst view. As for the foreign demand for gold, that has been stimulated by the scarcity of commercial bills, the backwardness of cotton exports accounting in considerable degree for this. Perhaps the most encouraging feature of the situation is the assurance of continued ease in money. The west and northwest are well supplied with currency; and as Chicago is steadily growing as a reserve center, and crop requirements will be less urgent than a year ago, there need be no uneasiness about money rates during the remaining summer and autumn months.

"Some remark is made concerning the less favorable character of maliroad earnings; still it should be remembered that comparisons are now being made with the extraordinary figures of last year. Increases and decreases in gross earnings are not always the true measures of market values. The speculator, as well as the investor, must take into consideration net results and prospective earning capacity as well as other factors. This is especially true of such lines as diverted a large source of last year's earnings towards betterments, which will enable them to operate more economically in times when there is less pressure of traffic.
